

Evey Huang, PhD

jjaxinh.evey@gmail.com | www.eveyhuang.com

My research lies at the intersection of Human-Computer Interaction, Artificial Intelligence, and Organizations. I bridge methods and disciplines including design research, system building, and computational social science to design, build, and evaluate human-centered AI systems that support human creativity, flourishing, and collaboration in domains like knowledge work, scientific research, and entrepreneurship. I also bring extensive experience in teaching & coaching project-based learning courses that help students apply design & technology to tackle real-world challenges and conduct impactful research.

EDUCATION

PhD, Technology and Social Behavior (Joint Program: Computer Science & Communication Studies)

Northwestern University, 2024

Advisors: **Elizabeth Gerber, Matthew Easterday**

M.S., Technology and Social Behavior

Northwestern University, 2023

BA, Economics; Berkeley Certificate in Design Innovation

University of California, Berkeley, 2017

APPOINTMENTS

Research Assistant Professor — Northwestern University, Kellogg School of Management (*Evanston, IL, Jul 2026 - Present*)

Postdoctoral Researcher — Northwestern University, Kellogg School of Management (*Evanston, IL, Feb 2025–Jun 2026*)

Mentors: **Brian Uzzi & Matthew Groh**

- Design and build multimodal AI pipeline to measure team behaviors and interactions from 1000+ hours of recorded real-world team meetings in scientific, innovation, and business domains, enabling large-scale & empirical team research previously infeasible via manual methods to understand what drives team success, provide early warning signals and course-correction in real organizations
- Design and conduct end-to-end experiments to evaluate AI's impact on various stages of scientific innovation in molecular cell biology domains, and characterize similarities, differences, and gaps in AI vs. human expert scientific thinking
- Independently write grant proposals and seek out external funding

Graduate Researcher — Northwestern University, Delta Lab (*Evanston, IL, Sept 2019–Dec 2024*)

Advisors: **Elizabeth Gerber & Matthew Easterday**

- Conducted in-depth qualitative inquiry and cognitive modeling to understand coaching practices
- Designed, built, and deployed proactive AI systems that collaborate with coaches to support novice entrepreneurs in solving real-world, complex problems in entrepreneurship by having more prepared, in-depth, and emotionally aware coaching meetings
- Established long term collaborative relationship with community partners to study coaching practices, co-design systems, and deploy the system to evaluate its impact on coaching activities.
- Evaluated computational and AI approaches to addressing online harassment; developed design guidelines and frameworks for researchers and practitioners

AI Advisor & Forward Deployment Engineer — Novohaven (*Remote, US/China, Oct 2025–Present*)

- Designed and built an agentic AI platform from scratch for a 10-person team in a cross-continent business, translating complex domain-specific professional workflows into governed, repeatable multi-step AI pipelines that supports the team's alignment and coordination.
- Led end-to-end human-centered design process with non-technical domain experts: elicited tacit workflow knowledge and coordination tasks through structured conversation, identified success criteria

per workflow, and translated that understanding into executable agentic systems — replacing ad hoc individual prompting with institutional-level intelligence

AI Technical Advisor — Spark AI (EdTech startup), China (*Remote, Dec 2024–Dec 2025*)

- Reviewed responsible AI and safety considerations across implementation and evaluation workflows; evaluated deployment risks and mitigation strategies for a vulnerable user population (children)
- Collaborated weekly with UI/UX designers, engineers, product managers, and CEO to assess technical feasibility, implementation quality, and user impact
- Delivered technical and design recommendations that shaped production-facing AI deployment decisions in a live education product serving K-12 classrooms

UX Researcher — Northwestern Memorial Hospital (*Chicago, IL, Jun–Aug 2022*)

- Conducted moderated qualitative usability research for Electronic Health Record (EHR) systems with older adult users, evaluating workflows including medication management and appointment scheduling
- Ran moderated studies with 12 elderly participants; identified 6 critical usability issues and delivered prioritized, actionable recommendations to design and engineering stakeholders

Research Intern — KAIST — Kixlab (*Daejeon, South Korea, Jun 2018–Jun 2019*)

Mentor: **Juho Kim**

- Built and evaluated crowd-powered systems for collaborative credibility assessment of online information; conducted formative interviews, rapid iterative prototyping, and usability assessment
- Created a labeled behavioral dataset of 5,000+ qualitatively coded tweets to train neural models for context-aware emoji recommendation; trained and evaluated the neural recommendation model

Undergraduate Research Assistant — UC Berkeley, Hybrid Ecologies Lab (*Berkeley, CA, Jun 2017–Jun 2018*)

Mentors: **Eric Paulos & Sarah Sterman**

- Modeled literary style using neural networks trained on crowdsourced human aesthetic judgments; built interactive analysis and visualization tools for writers to explore and interpret model outputs
- Conducted online experiments with 500+ participants evaluating human-AI interaction for creative writing tasks

PUBLICATIONS

Peer-Reviewed Conference & Journal Publications

1. **Huang, E.**, Easterday, M., Gerber, E. (2025). *AI That Helps Us Help Each Other: A Proactive System for Scaffolding Mentor-Novice Collaboration in Entrepreneurship Coaching*. CSCW 2025. (Presented in Bergen, Norway.)
2. **Huang, E.**, Sarma, A., Hwang, S., Chandrasekharan, E., Chancellor, S. (2024). *Opportunities, Tensions, and Challenges in Computational Approaches to Addressing Online Harassment*. DIS 2024. **Best Paper Honorable Mention (Top 5%)**.

Dissertation

Huang, E. (2025). *Human-AI Collaboration for Entrepreneurship Coaching: Leveraging a Cognitive Model and an LLM to Provide Proactive, Adaptive, and Differentiated Support*. PhD Dissertation, Northwestern University. Defended November 11, 2024.

GRANTS, AWARDS & RECOGNITION

Grants & External Funding

- [2026] **NNCI Collaborative Intelligence Research Awards**
 Title: *Grounding AI in Expert Cognition: A Diagnosis Layer for Entrepreneurial Coaching*
 Role: Wrote the full proposal
 Status: [In Review]
 PI: Evey Huang, Elizabeth Gerber, Matthew Easterday
- [2026] **Microsoft AI and the New Future of Work**
 Title: *Building Behavioral Process Models from Real Teams with Multimodal AI*
 Role: Independently wrote the full proposal
 Amount awarded: \$75,000;
 PI: Brian Uzzi
- [2026] **Google DeepMind & Stanford HAI AI for Organizations Grand Challenge**
 Title: *TeamLens: AI-Powered Analysis of Team Collaboration Processes to Surface Collaborative Engagement in Real Time*
 Role: Wrote and presented the proposal
 Result: Finalist (top 2% of 250+ proposals from 150+ universities worldwide).
 PI: Brian Uzzi, Matthew Groh

Awards & Honors

- Best Paper Honorable Mention (Top 5%) — ACM DIS 2024
- Special Recognition for Outstanding Reviews — CSCW 2022, CHI 2024, UIST 2024
- Advanced Cognitive Science Fellow — Northwestern University, 2021–2022
- Segal Design Research Fellowship — Northwestern University, 2021–2022
- Google PhD Fellowship — Department Nomination, 2021
- Microsoft PhD Fellowship — Department Nomination, 2021

INVITED TALKS & PRESENTATIONS

- **AI for Organizations by Stanford HAI and Google DeepMind** -- May 2026, Stanford, CA. Topic: Teams-AI Partnership: Using Multimodal AI to Reveal Collaboration Dynamics

- **Microsoft AI and Society Research Seminar** -- April 2025, Evanston, IL. Topic: Proactive human-AI collaboration.
- **Northwestern Center for Behavioral Intervention Technologies (CBIT)** -- May 2025, Evanston, IL. Topic: Proactive human-AI collaboration.
- **Designing with AI** — Guest Speaker, December 2024 & February 2025.
- **Northwestern Design Cluster** — April 2023.

TEACHING & MENTORSHIP

Instructor & Coach — HCI Studio (PBL), Northwestern University (*Fall 2023, Winter & Spring & Fall 2024*)

- Coached interdisciplinary teams of 3–5 undergraduates — CS engineers and non-technical designers/communicators — through the full human-centered design process: problem framing, user research, ideation, prototyping, and real-world evaluation
- Mentored 200+ students across 4 terms; translated between technical feasibility and creative vision; received consistently strong student feedback for coaching quality and accessibility

Instructor — Introduction to Natural Language Processing, Northwestern University (*Fall 2022, 2023*)

- Designed and taught NLP curriculum for undergraduates with zero prior programming or CS background; developed accessible instructional materials bridging technical concepts and practical application

Teaching Assistant — Communicating Your Research, Northwestern University (*Fall 2021*)

- Co-developed course materials and facilitated in-class activities for master's and PhD students on communicating complex research to diverse audiences

Graduate Student Peer Mentorship

- Provided tailored feedback and research support to peer PhD students in weekly pair-research sessions covering research design, writing, and project strategy

Undergraduate & Graduate Research Mentorship

- **Ava Grey** - Master student at Columbia University
- **Max Chalekson** - Master student at Northwestern University
- **Trisha Krishnan** - AI Robotics Intern at Bright Machines
- **Shubhanshi Gaudani** - Software Engineer at Microsoft

SERVICE & LEADERSHIP

Conference Organizing & Editorial Roles

- CSCW 2025 — Web Chair
- CSCW 2024 — Workshop Organizer (Collaboration Skills for Complex Work)
- HCI+D Conference, Northwestern 2022 — Poster Session Organizer

Paper Review

- CSCW: 2022 (Special Recognition for Highly Useful Review)
- CHI: 2021, 2022, 2024, 2026 (Special Recognition for Outstanding Reviews)
- UIST: 2024 (Special Recognition for Highly Useful Review), 2026

Community Service

- 2020, 2022, 2023 — Organized Northwestern alumni events at CHI and CSCW conferences
- 2019–2023 — Social Event Organizer, School of Communications, Northwestern University
- 2020–2025 — Panelist and Volunteer, Northwestern University PhD Interview Weekend
- 2019–2023 — Board Member, Women in Science and Engineering Research (WISER)

SKILLS

AI & Machine Learning

- Machine learning: classification, random forests, clustering, topic modeling
- AI: Neural networks, NLP, deep learning (PyTorch, TensorFlow), LangChain, Hugging Face; model fine-tuning: LoRA, post-training tuning, Multimodal AI (vision + language), LLM-as-a-judge

Programming & Engineering

- Python (primary); data science: Pandas, NumPy, R, scikit-learn
- Full-stack web development: JavaScript, React, Node.js, React Native
- Backend: Flask, Django, FastAPI; databases: MongoDB, MySQL, Firebase
- Cloud & data pipelines: AWS; HTML/CSS, REST API design

Research Methods

- Design Research: Research-through-design, participatory design ...
- Qualitative Methods: Ethnography, in-depth interviews, usability testing, heuristic evaluation, cognitive walkthroughs, Wizard of Oz studies, Think aloud, Cognitive task analysis, interaction analysis ...
- Quantitative Methods: Statistical analysis, topic modeling, cluster analysis, semantic analysis, survey design, interaction log analysis, ...
